

DINESH RAO

PHP Laravel Developer

✉ dineshrao275@gmail.com ☎ 8290667849 📍 64/3 Savindnagar, Tilak Nagar, Indore 452018

🐙 Github 🔗 Portfolio

PROFESSIONAL SUMMARY

Skilled PHP Laravel Developer with 3 years of hands-on experience in building dynamic web applications. Proficient back-end development, ensuring seamless integration and performance. Successfully developed and deployed multiple projects, including Franchisee Management System, Bumble Roofing and One stop jewellery (IMS). Passionate about continuous learning and staying updated with emerging technologies. Strong problem-solving skills with a focus on scalability, security, and performance optimization.

WORK EXPERIENCE

Software Engineer, FiftyFive Technologies  06/2025 – Present
Indore

- Developed and maintained backend modules using Laravel 10, ensuring clean architecture, optimized queries, and scalable code.
- Built and integrated RESTful APIs for various client projects, including third-party API integrations and data processing workflows.
- Collaborated with front-end teams to deliver seamless Laravel features with efficient routing and smooth user experience.
- Implemented authentication, authorization, validation, and middleware to enhance security and control access across applications.
- Performed debugging, code reviews, and deployment activities while ensuring performance, reliability, and adherence to best practices.

Software Engineer, Sofmen Technologies 2023 – 04/2025
Indore, India

- Designed and developed scalable web applications using PHP Laravel.
- Built and integrated RESTful APIs for seamless communication between client and server.
- Implemented authentication and authorization mechanisms using JWT and OAuth.
- Improved API response time by 30% through optimized database queries in MySQL.

TECHNICAL SKILLS

Frontend

JavaScript, HTML5, CSS3

Backend

PHP, Laravel

Databases

MySQL

Version Control

Git, GitHub, GitLab

Tools & Others

REST APIs, Postman, JWT Authentication

PROJECTS

Bumble Roofing, (Roofing Services Platform for US Citizens)

- Implemented an online quote generation system, improving user engagement by 0%.
- Developed an interactive customer inquiry form and integrated it with backend APIs.

Franchisee Management System, (Admin Portal for Franchise Management)

- Built a multi-account franchise management portal for handling financial operations.
- Utilized Laravel and MySQL for secure and efficient data processing.
- Enhanced system security by implementing role-based access control (RBAC).

Wallaby Windows, (Home Improvement Services for US Citizens)

- Developed web interfaces with for a modern, responsive experience.
- Integrated payment gateways and third-party APIs for enhanced functionality.
- Increased website load speed by 25% through optimized image loading and caching.

One Stop jewellery, (Gold Inventory management System)

I developed and maintained a Gold Inventory Management System using Laravel (backend), MSSQL (database), and React.js for the invoicing section to ensure a seamless, reload-free user experience. This system efficiently managed gold stock by tracking weight, purity (22K, 2K, etc.), and item types, while supporting supplier and customer profiles with detailed transaction histories. Invoicing was made dynamic using React, with real-time calculations of net weight, wastage, making charges, and taxes. Additional features included role-based access.

FFTL(Faculty Feedback on Teaching Learning), (Feedback System my final year project)

I developed the FFTL (Faculty Feedback on Teaching and Learning) system for Shri Vaishnav Institute of Management, Indore (M.P.) using Laravel and MySQL. The system allows students to securely submit feedback on faculty performance, with role-based access for admins, faculty. It features dynamic forms, real-time submission, and automated report generation. I also deployed it on the institute's internal server, making the feedback process more efficient, accurate, and transparent.

Koala Insulation, (Insulation providers for the US based citizens)

I maintained and enhanced the Koala Insulation website (koalainsulation.com), which includes a robust CMS for microsite management. Each franchisee is provided with their own microsite that can be customized through the CMS, allowing them to manage local content, offers, and service areas while ensuring brand consistency across all locations. I also developed and maintained a Royalty Report Submission module that enables franchisees to submit weekly, monthly, and quarterly revenue reports. These reports go through an approval workflow by the admin, helping streamline financial oversight and compliance. Additionally, I created a dedicated portal for Koala Canada, tailored for Canadian franchisors, with the same core functionalities adapted to regional requirements. To ensure seamless data exchange and real-time updates, I developed secure APIs for communication between the US and Canadian platforms, enabling centralized monitoring and unified reporting across both systems

EDUCATION

Master of Computer Applications (MCA), <i>Shri Vaishnav Institute of Management</i> CGPA: 8.53	2021 – 2023 Indore, India
Bachelor of Computer Applications (BCA), <i>Mohanlal Sukhadiya University</i> CGPA: 7.3	2018 – 2021 Udaipur, India
